

## PRESS RELEASE

# London Underground becomes a Guard-Assure User

**Santa Barbara, California – November 4, 2008.** EZ-Assure, an innovator and leading provider of web-based complete security solutions, announced today that London Underground is now a Guard-Assure user.

“**After the 7/7 bombings**”, as part of a broad-based program to enhance security, London Underground implemented a system that would automatically verify that security guards were checking what they should when they should, and most importantly, alerting them when something was missed,” said Euan Slidders. Managing the negative provides the positive!

“Our Guard-Assure solution not only fit those requirements but also had two major advantages over competing products. First, our solution is hosted so that guard activity can be managed remotely, online, and shared as desired, such as with the **British Transport Police**.

Second, our solution allowed London Underground to choose whatever hardware they wanted. They had their choice of sensors to be placed at check points, including Barcode, RFID or i-Buttons, as well as their choice of the handheld devices to be carried by the guards. Our solution will grow with London Underground and allow different choices of hardware in the future, without the need to operate multiple systems.

“Our commitment with Guard-Assure, as with all our solutions, is to provide our customers a complete solution to their security challenges that is easy to use and delivers compelling value. We are proud to add London Underground to our growing list of customers.”

### **About EZ-Assure**

EZ-Assure is an innovator and leading provider of Web-based complete security solutions. Key products include Park-Assure, which provides electronic access control of parking equipment without the need for onsite power; Access-Assure, which provides electronic access control without wiring; and Secure-Audit. EZ-Assure solutions are installed among customers in the United States, Europe and Asia. For more information, visit [www.ez-assure.com](http://www.ez-assure.com).
